

The Action Agenda in the Strait of Juan de Fuca

Profile³³

The Strait of Juan de Fuca (Action Area and geographic area for the Local Implementing Organization) includes the waters and associated watersheds from the northwestern tip of the Olympic Peninsula (Cape Flattery) to the eastern end of the Strait of Juan de Fuca (Point Wilson at Port Townsend). It is home to the Makah, Lower Elwha Klallam and Jamestown S’Klallam Nations and tribal reservations, the cities of Port Townsend, Port Angeles, and Sequim, and much of Olympic National Park.

The Strait of Juan de Fuca is the bridge between inner Puget Sound and the Pacific Ocean. It provides an essential pathway for exchange of incoming cold, dense saltwater and the circulation of freshwater runoff from Puget Sound and Georgia Basin rivers. This exchange, assisted by strong ocean currents in the western Strait and intense tidal action in the eastern end prevents the marine waters of this area from becoming stagnant.

The Strait Action Area has a rugged and diverse shoreline of 217 linear miles. The uplands are primarily forested, with most of the upper watersheds lying in federal, state, or private parks, forest or timberland. Many of the upper watersheds are in Olympic National Park. In other places, commercial

³³ Puget Sound Partnership will double check facts and figures listed in profiles during the public review period.

timber harvest remains an important economic sector, supporting active lumber mills in Port Angeles. More than three-quarters of the private land west of the Elwha watershed is zoned for commercial forest, and portions of the western Strait are in their third rotation for timber harvest. Agriculture also is part of the rural landscape along the Strait, with approximately 5,000 acres of irrigated farmland in the dry Sequim-Dungeness Valley. Smaller scale agriculture occurs in other scattered areas, particularly the Salt Creek area west of Port Angeles and in the Discovery Bay watershed.

Many other economic activities in the Strait also depend directly on the Puget Sound ecosystem, and include ship building/repair, marinas, shellfish culture and harvest, commercial and recreational fishing, and tourism. A large retirement population, drawn by the relatively dry climate, scenic environment, and other community features, has shifted the eastern Strait economy toward more service-based activities. Marine transportation is hugely reliant on the Strait of Juan de Fuca, as almost all the vessels entering or leaving the seaports of Puget Sound and the Georgia Basin pass through the Strait.

Unique ecosystem characteristics and assets

The Strait of Juan de Fuca is the migration and transportation corridor between Puget Sound and the Pacific Ocean for many species of fish, marine mammals, bird populations, and humans. The marine shoreline and nearshore contain the majority of Washington’s coastal kelp resources. The Strait has 95 (linear) miles of floating kelp, 161 miles of non-floating kelp, and 75 miles of eelgrass. The kelp forests and eelgrass meadows provide food and cover for outbound and returning runs of salmon from all over Puget Sound, as well as birds, marine mammals, and the species they depend on. The connectivity of

kelp and eelgrass habitat in the Strait is essential to the function of the Puget Sound ecosystem. Sheltered bays, beaches and over 22 small “pocket” estuaries at the mouths of the many creeks entering the Strait also support salmon, bull trout, forage fish and shellfish.

Notable Accomplishments

Large scale restoration continues on the Dungeness River Floodplain, including multiple acquisitions for habitat protection.

Significant progress has been made on instream flow in the Dungeness area.

The Morse Creek Channel re-meander project reconnected the mid-reaches of Morse Creek with 9 acres of its historical floodplain.

Phased protection of the Pshyt River floodplain through acquisition and revegetation will also open public access.

Unique populations of raptors, marine birds, Roosevelt elk, black-tailed deer and other mammals, as well as anadromous and resident fish, are found throughout the Strait. Notable bird species include the federally-protected northern spotted owl and marbled murrelet. Olympic National Park recently reintroduced the fisher, a larger relative of the weasel, which has been locally extinct for decades. The population of sea otters that migrates between the outer coast and the Strait has increased from the initial 59 animals reintroduced in 1969-1970 to 800 animals, but is still small enough to be highly vulnerable to a catastrophic event such as an oil spill. Protection Island, part of the Dungeness National Wildlife Refuge, is a critically important marine bird rookery for Puget Sound. This island and other portions of the Strait are important haul-out areas for seals and sea lions.

In 2011, the three-year process of removing the Elwha and Glines Canyon dams was started in order to restore a free-flowing Elwha river. The largest dam removal project in

US history will reopen more than 70 miles of pristine spawning and rearing habitat in the Elwha River and its tributaries. Salmon populations are predicted to swell from 3,000 to nearly 400,000 as all five species of Pacific salmon return to one of the Pacific Northwest's most productive salmon streams. The Elwha is the largest watershed in Olympic National Park, and the return of salmon to this ecosystem will return marine-derived nutrients to the watershed, restoring a vital food source for the range of life that inhabits it.

Local Action Agenda Process

The Strait Ecosystem Recovery Network (ERN) is the Local Integrating Organization (LIO) for the Strait Action Area, and leads the prioritization and implementation of Action Agenda strategies in the Strait Action Area. The Strait ERN undertook an extensive and aggressive effort to complete a Strategic Plan and Work Plan to implement the Action Agenda within the Strait Action Area for the 2011-13 Biennium. As part of this process the Strait ERN began by identifying and ranking the most immediate and significant "local threats" to the entire Strait of Juan de Fuca / North Olympic Peninsula ecosystem (i.e., Strait of Juan de Fuca Action Area geography) that may best benefit from the focused support and advocacy work of the collective membership of the Strait Ecosystem Recovery Network to accomplish actions at the local, state, tribal, and federal levels (see Key Threats/Pressures list below). Once the threats were identified, the Strait ERN identified a list of 25 strategic priorities and then used the regional strategy prioritization methods from "open standards" as a guide to rank six of the 25 Strategic Priorities to be of the highest priority within the 2011-13 biennium for the Strait Action Area (see Priorities list below).

Key Threats/Pressures

The Strait ERN has identified 17 local threats to the health of the Strait of Juan de Fuca Ecosystem. These threats are listed in rank order as determined by the Strait ERN.

1. Surface Water Loading and Excessive Runoff from the Built Environment
2. Human Sewage
3. New Shoreline and Upland Modifications that Damage Intact Habitat and Habitat-Forming Processes
4. Legacy Toxic Contamination Sources - Large Scale
5. Oil and Hazardous Materials Spills - Large Scale
6. Legacy Infrastructure - Large Scale
7. Land Use Conversions of Farms and Forests to Other Uses
8. Climate Change Induced Stressors
9. Water Withdrawal and Diversions
10. Unsustainable Fishing/Harvesting
11. Invasive Species and Other Problematic Species - Terrestrial, Freshwater, Estuarine, Marine
12. Timber Harvest, Forest Practices, and Silvicultural Operations - Large Scale
13. Agriculture and Livestock Grazing Operations
14. Derelict Gear and Vessels
15. Air Pollution and Atmospheric Deposition

16. Marine Commercial Vessel Traffic Hazards
17. Aquaculture

Opportunities, Priorities and Near Term Actions

The Strait ERN identified 25 Strategic Priorities for the Strait Action Area. They ranked six of these as the highest priority for the 2011-13 biennium. These highest priorities, which are also considered to be the Near-Term Actions (NTA) for the Strait Action Area, include (in rank order):

1. **Elwha River Ecosystem Recovery** – Implement Elwha River Ecosystem Recovery Efforts and associated projects.
2. **Salmon Recovery Plans** (Puget Sound Salmon Recovery Plan and Hood Canal/ Eastern Strait of Juan de Fuca Summer Chum Recovery Plan) – Implement N. Olympic Peninsula Lead Entity (NOPLE) for Salmon and Hood Canal Coordinating Councils Lead Entity (HCCC-LE) 3-year Work Plans.
3. **Oil Spill Prevention, Preparedness, and Response** – Implement and promote improvements in oil spill prevention, preparedness, and response programs, policies, or capabilities for the benefit of the Strait of Juan de Fuca and adjacent waters.
4. **Shoreline Master Program Updates, Implementation, and Intergovernmental Coordination** (Jefferson County, Clallam County and cities of Port Townsend, Sequim, and Port Angeles).
5. **Stormwater Management Program Updates and Implementation** (Clallam, Jefferson, Port Angeles, Sequim, and Port Townsend).
6. **Instream Flow Rules** – Adopt and/or implement Instream Flow Rules for Water Resource Inventory Areas (WRIAs) 17, 18 East, 18 West, and 19.

The additional 19 strategic priorities (in alphabetical order) are:

- **Aquatic Resources Habitat Conservation Plans** - Develop and implement Aquatic Resources Habitat Conservation Plans (HCP)
- **Carlsborg Wastewater Treatment and Water Reuse** - Implement Carlsborg Urban Growth Area Wastewater Treatment and Water Reuse Strategy
- **Clean Water District Plans** (Sequim-Dungeness Bay & Eastern Jefferson County) - Implement Sequim-Dungeness Bay and East Jefferson County Clean Water Districts projects and programs, including TMDL implementation strategy and/or on-site sewage management programs
- **Climate Change Mitigation, Adaption, and Implementation of Programs and Plans** - Account for the effects of climate change by appropriately mitigating or adapting projects, programs, local ordinances, and regulations. Enable Strait ERN member organizations to implement local climate change programs and plans.
- **Critical Areas Ordinances** - Update, implement, and enforce Critical Areas Ordinances
- **Forest Practices** - Implement sustainable and ecologically sound forest practices on public and private timberlands.
- **Green Jobs** - Promote ecosystem-based “Green Jobs” and businesses
- **Landfill Assessments, Closure, and Remediation** - Assess,, close, and remediate, where necessary, solid waste landfills within the Strait of Juan de Fuca Action Area
- **Local Recovery Capacity** - Build local capacity of the Strait ERN and its active member organizations to strategically plan, collaborate, and coordinate; obtain funding; update, manage,

and implement programs and projects; and enforce local codes and ordinances throughout the Strait Action Area

- **Marine Resource Plans (Clallam and Jefferson MRCs)** - Implement Marine Resources Committee's Action Plan for Clallam and Jefferson counties and Northwest Strait Commission Regional Projects
- **Migration Corridor Integrity** - Protect and restore the Strait of Juan de Fuca Action Area (including its marine, estuarine, and fresh waters) as a migratory corridor for fish, marine birds, orcas, and other species
- **Non-Indigenous Species Programs** - Promote programs and projects that prevent or reduce the effects of bio-Invasions of marine (including from ballast water), freshwater, or terrestrial non-indigenous species
- **Outreach, Education, Public Involvement: A. Strait ECO Net** - Support the efforts of Strait ECO Net to provide consistent and coordinated outreach, education and involvement opportunities for the general public; **B. Technical Assistance** - Support the efforts of the Conservation Districts and others to provide technical assistance to homeowners, landowners, and businesses; Support efforts to provide locally available professional training opportunities; **C. BuiltGreen™** - Support the effort to promote and market BuiltGreen™ development, particularly LID, toxics reduction, energy savings, and sustainable and regenerative power and water practices.
- **Port Angeles Harbor Ecosystem Recovery** - Clean up and restore Port Angeles Harbor and waterfront
- **Sewage Discharges (Treated and Untreated)** - Reduce harmful discharges of pollutants from ships, sewage outfalls, and biosolids applications.
- **Sustainable Commercial, Tribal, and Recreational Fishing and Shellfishing** - Promote the sustainable harvest of finfish and shellfish.
- **Toxic Source Reduction Programs** - Improve, develop, and implement toxics source reduction programs and projects.
- **Watershed Planning Detailed Implementation Plan Development and Implementation (WRIAs 19, 18 West, 18 East, and 17)** - Develop and/or implement Watershed Planning (2514) Detailed Implementation Plans (DIPs) for WRIAs 19, 18 West, 18 East, and 17
- **Working Lands and Tidelands Protection** - Protect (long term); support stewardship; and promote sustainable and ecologically sound principles and practices for working farms, forests, and aquaculture/mariculture operations.

The "Strait ERN 2011-13 Biennial Work Plan, Appendix A2, Strait ERN Priority Actions" contains a comprehensive list of actions for all 25 strategic priorities identified by the Strait ERN. This list includes the sequencing (or prioritization) in which actions should occur under each strategy and identifies possible lead government/ agency/ organizations as well estimated funding needed for the 2011-13 biennium for each action. For the purposes of the Action Agenda update, the Strait ERN would like to highlight actions under the top six strategic priorities. The Strait ERN considers the multiple actions under each priority to constitute a "packaged" near-term action, which is identical to the strategic priority. For example, the three "sub" actions under the first strategic priority all roll up the action (and strategy) of "Elwha River Ecosystem Recovery." The six packaged actions are listed below. For more details on the sub-actions, see Appendix 2 of the Strait ERN 2011-13 Biennial Work Plan.

"PACKAGED" PRIORITY NTAS	POSSIBLE LEAD GOVERNMENT, AGENCY, AND/OR ORGANIZATION	POTENTIAL FUNDING SOURCE(S)	PROPOSED PERFORMANCE MEASURE
Elwha River Ecosystem Recovery (ID #6)* <ul style="list-style-type: none"> • Stock preservation and weir operation • Monitoring (adults, juveniles, smolts) • Habitat restoration projects 	Elwha Fish Committee partners and others	SRFB, PSAR, EPA Lead Organizations	Continuous weir operation and monitoring of salmonids (adults, juveniles, and smolts) on the Elwha River
Salmon Recovery Plans (ID#18) <ul style="list-style-type: none"> • North Olympic Peninsula (NOP) LE 3-year Work Plan • NOPL EElwha revegetation project • NOPL E Dungeness River floodplain restoration, Phase II • NOPL E Elwha ELJ's • Hood Canal Coordinating Council (HCCC) LE 3-year Work Plan • HCCC LE Snow Creek and Salmon Creek estuary restoration 	North Olympic Peninsula Lead Entity, Hood Canal Lead Entity, and their respective member organizations	SRFB, PSAR, EPA Lead Organizations (Components: Watershed Protection and Restoration; Marine and Nearshore Protection and Restoration; and Toxics and Nutrients Prevention, Reduction, and Control)	Initiate or significantly advance all of the four specific Priority Actions identified by the Strait ERN for the Strait Action Area
Oil Spill Prevention, Preparedness, and Response (ID#15) <ul style="list-style-type: none"> • Support equipment standards rulemaking • Support trans-boundary coordination on oil spills • Makah Tribal Council Oil Pollution Initiative and Vessel of Opportunity Program • Participate on cross-partnership Oil Spill Workgroup • Geographic Response Plans (GRP) data • Participate on Northwest Area Committee (NWAC) • Work to expand drills along Strait of Juan de Fuca and coast • Organize local volunteers • Establish a liaison role during spill events for Strait Action Area • Support establishment of response to tugs along Strait of Juan de Fuca 	Strait ERN Oil Spill Task Force member organizations	WDOE as the EPA Lead Organization for Toxics and Nutrients Prevention, Reduction, and Control component	Initiate or complete 40% of the Priority Actions identified by the Strait ERN for the Strait Action Area (i.e. Priority Action ID#s 15a through 15j)
Shoreline Master Program Updates, Implementation, and Intergovernmental Coordination (Jefferson County, Clallam County and cities of Port Townsend, Sequim, and Port Angeles) (ID#20) <ul style="list-style-type: none"> • City of Port Townsend SMP – stormwater 	Clallam and Jefferson counties and Cities of Port Angeles, Sequim, and Port Townsend, and others	EPA Lead Organizations (Components: Watershed Protection and Restoration; Marine and Nearshore	Recommended Option: Develop the economic baseline (Ecosystem Valuation) for the ecosystem functions that will be

* Specific Priority Actions remain to be determined for this Strategic Priority at a future Strait ERN Speaker Forum.

Local Implementation Structure

Starting in 2010, the Strait ERN held nine quarterly meetings to identify local treats, priorities, and near-term actions. The Strait ERN also held seven Speaker Forums to gain background information on strategic topics, including: oil spill preparedness, prevention, and response; multi-state agency watershed characterization project; Aquatic Lands Habitat Conservation Plan; Forest Practices Habitat Conservation Plan; climate change adaption; NOAA Biological Opinion / FEMA National Floodplain Insurance Program – local implementation; and Strait of Juan de Fuca as a migratory corridor for salmonids.

Participants in this process included the following:

- **Tribes** – Makah, Lower Elwha Klallam, Jamestown S’Klallam, and Port Gamble S’Klallam
- **Counties** – Clallam and Jefferson
- **Cities** – Port Angeles, Sequim, and Port Townsend
- **Port** – Port Angeles
- **Government Entities / Agencies** – Clallam and Jefferson Conservation Districts, Hood Canal Coordinating Council (HCCC), Puget Sound Partnership, Washington Departments of Fish and Wildlife, Ecology, and Natural Resources, US Coast Guard
- **Watershed Management, Salmon Recovery, and Marine Organizations** – North Olympic Lead Entity for Salmon and HCCC-Lead Entity (for salmon recovery), Management Teams or Councils for Watershed Resource Inventory Areas 19, 18 (including Elwha-Morse Management Team and Dungeness River Management Team), and 17, and Clallam and Jefferson Marine Resources Committees, a part of the Northwest Straits Commission
- **Business-Based Non-Governmental Organizations** - North Olympic Timber Action Committee, Pacific Shellfish Growers Association, North Peninsula Home Builders Association - BuiltGreen® of Clallam County
- **Natural Resource-Based and Working Land Preservation Non-Governmental Organizations (with wide Strait of Juan de Fuca geographic coverage)** - North Olympic Salmon Coalition, North Olympic Land Trust, Jefferson Land Trust, Coastal Watershed Institute, Olympic Environmental Council, Protect the Peninsula’s Future, People for Puget Sound, North Olympic Peninsula Group of the Sierra Club
- **Educational Institutions** - WSU Clallam and Jefferson County Extensions

IMPLEMENTATION COORDINATION IN THE STRAIT OF SAN JUAN DE FUCA

The Strait ERN covers the Strait Action Area. The LIO, which officially formed in 2009, is made up of leaders (i.e., elected officials and high-level staff) from a diverse set of governments, agencies, special districts, organizations, recovery processes, institutions, and key businesses and business groups in the Strait of Juan de Fuca Action Area. The LIO’s co-chairs are the Strait Action Area’s representative and the alternate to the Partnership’s Ecosystem Coordination Board. The LIO is guided by a Steering Group. The LIO forms Task Force groups, made up of volunteers from the membership, as needed to focus on implementing local strategies and actions.

- **Place-Based Educational / Public Involvement Organizations** – Feiro Marine Science Center, Dungeness River Audubon Center, and Port Townsend Marine Science Center
- **Volunteer-Based Public Involvement Organizations** – Washington State University Clallam and Jefferson County Beach Watchers/Water Watchers and Shore Stewards and Clallam County Streamkeepers
